SUMMARY

Backend Developer with 3 years of experience in Python and Flask. Comfortable with REST API development, SQL databases, and Docker deployments. Eager to grow in a challenging backend engineering role focused on scalable systems.

WORK EXPERIENCE

Backend Developer — Startups Hub Pvt Ltd (2021–Present)

- Built and maintained Flask REST APIs for a food delivery platform with 50K daily users
- Designed MySQL and PostgreSQL schemas and wrote optimized SQL queries
- Containerized applications using Docker and deployed on AWS EC2
- Integrated Razorpay payment gateway and Twilio SMS API
- Used Git for version control and participated in Agile sprint planning

Junior Python Developer — CodeBase Solutions (2020–2021)

- Developed Python scripts for data processing and automation tasks
- Wrote SQL stored procedures and maintained MySQL databases
- Assisted in building Django admin dashboards for internal tools

EDUCATION

B.Tech in Information Technology — Mumbai University (2020)

TECHNICAL SKILLS

Python, Flask, Django, REST API, MySQL, PostgreSQL, Docker, AWS, Git, Linux, HTML, CSS, JavaScript, Agile, Scrum, pytest

PROJECTS

Food Delivery Backend API (2022)

- Built complete order management REST API using Flask and PostgreSQL
- Implemented JWT authentication and role-based access control
